MEMORANDUM

FOR THE MEMBERS OF THE RESTORATION ADVISORY BOARD (RAB) FOR THE INSTALLATION RESTORATION PROGRAM AT NAVAL WEAPONS INDUSTRIAL RESERVE PLANT (NWIRP) CALVERTON, NEW YORK

The Navy is forwarding the enclosed data package for your information. This data package includes figures that were generated from the Calverton EVS for IR Site 6 - Fuel Calibration Area plus the offsite component known as the Southern Area. The figures were based on the latest round of groundwater analytical data collected during calendar year 2000 which was implemented in accordance with the Navy's plan of action for data gap analysis presented at the February 16, 2000 RAB Meeting.

The information contained in the enclosed data package will be discussed at an upcoming Technical Review Committee (TRC) Meeting scheduled for the morning of Tuesday, October 24, 2000. The data will then be incorporated into a revised RCRA Facility Investigation (RFI) Report that will address Site 6 and the Southern Area only. This report will be issued under separate correspondence.

If you have any questions regarding the enclosed data package, please give me a call me at (610) 595-0567, extension 163.

Sincerely,

JAMES L. COLTER
Remedial Project Manager
By direction of the
Commanding Officer
